

Testimonials

From Peak Wellbeing

"Marisa from Complete the Picture created a coaching program for our company. The key components were marketing research, analysis and strategic planning.

During the program, Marisa's expert advice and coaching enabled us to have a much clearer picture of our business, our market and our direction.

Working with Marisa forced us to think more broadly in terms of learning how to understand the market we are in, where we are headed, how to be flexible and how our internal systems and talents reflect our business.

This level of analysis, research and strategic planning is helping us move toward achieving our vision for supporting the mental, physical and social wellbeing of our community.

Marisa is friendly, approachable and focused on the needs and goals of her clients. Her coaching style resonated with us and she is clearly an expert in this field.

We will continue to partner with Marisa for her expertise and approachable coaching method.

Thank you, Marisa, for all your valuable guidance and support. We look forward to this journey together with you."

From The Potential Ability Group

"We engaged the services of Marisa and the team at Complete the Picture via a grant from the SME Business Advisory Services Program, with a view to helping us identify opportunities for growth, with a particular emphasis on diversification and creating passive income opportunities.

Throughout the whole process Marisa was attentive, easy to communicate with, and quickly gained a grasp on what we required and the space we worked in, which was no easy task. We were asked to provide specific and key information to help inform and direct the recommendations made to us, and kept updated throughout the process as to the project status.

We were impressed with the detail in the report and analysis supplied, and the variety of recommendations and justifications given. I would highly recommend Marisa and the team at Complete the Picture."
